# 2

Sources: World Health Organization ( WHO )

Referring to the article stated in 2019nCoV above, No spraying alcohol or chlorine all over your body will not kill viruses that have already entered your body.

Our company are strongly agreed if the virus had been entered into the body, it won't be help on spraying alcohol or chlorine or even any of medicine for body surface. Once infected, the patient should admission to hospital immediately.

During this pressing period, our company disinfection channel are using CLO2 ( Chlorine Dioxide ) to do the sanitizing. This is to prevent the virus, bacterial and fungus that carry on the shirt and body surface and hence prevent the virus, bacterial and fungus transmitted to others before get in touch with someone and spread from A venue to B venue or the object touched.

Herein, as a responsible citizen, we wish everyone of us may do the disinfection channel or self-sanitizing while entering to the public venue to prevent virus transmission. With this disinfection channel, although it unable to kills the virus inside the body, but it might kills the virus, bacterial and fungus surrounding the body surface. It's might reduce the chances of transmission.

Hence, we had discovered and introduced the CLO2 ( Chroline Dioxide ) from the products of Dutrion Netherlands and Products Asylea from Australia for our disinfection channel and others Sanitizing products. CLO2 ( Chroline Dioxide ) is safe for human body but not recommend for drink and It DOESN'T contain any alcohol. It had been approved by WHO , EPA and NSF international test report.

We are grade to hear if any of the consumer or professional had discovered any disinfection medicines better than CLO2 and might against the COVID-19. We wish the products can be share out for publics use.

Disinfection channel had been widely used in CHINA, INDONESIA, VIETNAM and KOREA at this moment. Especially WIDELY used in CHINA. The result can be seen and it had been effectively controlled.

Last, Preventions is better than cure. Hygiene cleaning, wash hand, wearing mask and sanitizing is a must. We hope everybody may start our own responsible to protect yourself and your love one to reduce the burden of government and our lovely brave frontlines. Stay health.

资料来源：世界卫生组织（WHO）

参考以上2019nCoV中所述的文章，在人体身体上喷洒酒精或氯气不会杀死已经进入您体内的病毒。

我们公司强烈同意，如果该病毒已进入人体，则对喷洒酒精或氯气甚至在身体表面的任何药物都无济于事。一旦被感染，患者应立即入院。

在此紧迫时期，我们公司的消毒通道正在使用CLO2（二氧化氯）进行消毒。这是为了防止在衬衫和体表上携带的病毒，细菌和真菌，从而防止在与某人接触并从A场所传播到B场所或所触摸的对象之前传播给他人的病毒，细菌和真菌。

在此，作为负责任的公民，我们希望我们每个人在进入公共场所时都可以进行消毒或自我消毒，以防止病毒传播。有了这个消毒通道，尽管它不能杀死体内的病毒，但可以杀死围绕身体表面的病毒，细菌和真菌。这可以减少病菌传播的机会。

因此，我们从荷兰Dutrition产品和澳大利亚产品Asylea产品中发现并引入了CLO2（二氧化氯）作为我们的消毒通道和其他消毒产品。

CLO2（二氧化氯）对人体安全，但不建议饮用，并且不含任何酒精。它已被WHO，EPA和NSF International 认同。

我们很高兴得知是否有任何消费者或专业人士发现了比CLO2更好的任何消毒药，并可以对抗COVID-19。我们希望这些产品可以共享给公众使用。

目前，消毒通道已在中国，印度尼西亚，越南和韩国广泛使用。特别是在中国广泛使用。结果可见，并且已经得到有效控制。

最后，预防胜于治疗。必须进行卫生清洁，洗手，戴口罩和消毒。我们希望每个人都可以担负起责任来保护自己和您的爱人，以减轻政府的负担和我们勇敢的前线。保持健康。

**No. Spraying alcohol or chlorine all over your body will not kill viruses that have already entered your body. Spraying such substances can be harmful to clothes or mucous membranes (i.e., eyes, mouth). Be aware that both alcohol and chlorine can be useful to disinfect surfaces, but they need to be used under appropriate recommendations.**

**Can spraying alcohol or chlorine all over your body kill the new coronavirus?**

World Health Organization #2019nCoV

Merujuk kepada artikel yang disebutkan di 2019nCoV di atas, menyembur alkohol atau klorin di badan tidak akan membunuh virus yang telah dijangkit ke dalam badan kita.

Syarikat kami sangat setuju bahawa jika virus itu telah memasuki ke dalam badan, menyembur alkohol atau klorin tidak akan menghapuskan virus yang sudah masuk ke dalam badan. Setelah dijangkiti, pesakit harus memasukan hospital dengan segeranya.

Dalam tempoh mendesak ini, saluran pembasmian kuman syarikat kami menggunakan CLO<sub>2</sub> (klorin dioksida) untuk pembasmian kuman. Ini untuk mencegah virus, bakteria, dan jamur yang dibawa ke permukaan baju dan badan, dan dengan demikian untuk mencegah virus, bakteria, dan jamur menyebar ke orang lain sebelum bersentuhan dengan seseorang dan menyebar dari laman A ke laman B atau objek yang disentuh.

Di sini, sebagai warganegara yang bertanggungjawab, kita berharap setiap warganegara boleh membasmi kuman sekeliling kita ketika memasuki tempat awam untuk mencegah penyebaran virus. Dengan menggunakan saluran pembasmian kuman ini, walaupun tidak dapat membunuh virus di dalam tubuh badan, ia dapat membunuh virus, bakteria dan jamur di sekitar permukaan tubuh badan. Ini boleh mengurangkan peluang penyebaran.

Oleh itu, kami menemui dan memperkenalkan CLO<sub>2</sub> (klorin dioksida) sebagai saluran pembasmian kuman dan produk pembasmian kuman lain dari produk Dutrin di Netherlands dan produk Asylea di Australia. CLO<sub>2</sub> (klorin dioksida) selamat untuk tubuh manusia, tetapi tidak diperakukan untuk diminum dan CLO<sub>2</sub> ini tidak mengandungi alkohol. Produk ini telah disetujui oleh WHO, EPA dan NSF International.

Kami gembira mengetahui jika ada pengguna atau profesional yang mendapati pembasmi kuman lebih baik daripada CLO<sub>2</sub> dan mungkin melanggar COVID-19. Kami berharap produk ini dapat dikongsi dengan orang ramai.

Pada masa ini, saluran pembasmian kuman telah banyak digunakan di China, Indonesia, Vietnam dan Korea Selatan. Terutamanya digunakan di China. Hasilnya dapat dilihat dan dikendalikan dengan berkesan.

Akhirnya, pencegahan lebih baik daripada mengubati. Pembersihan kebersihan, mencuci tangan, topeng dan pembasmian kuman mesti dilakukan. Kami berharap semua orang dapat memikul tanggungjawab untuk melindungi diri dan orang yang anda sayangi agar dapat mengurangkan beban kerajaan dan pihak yang berdiri di barisan depan and berani. Kekal sihat.

**产品描述 (Chinese)**

CLO2 DUTRION 消毒颗粒丸,最佳消毒和水基非酒精饮料。  
 终极细菌解决方案！病毒消失  
 最佳杀菌无酒精消毒丸，多用途杀菌消毒颗粒！病毒消失

价钱: **RM475.00** 每罐                      数量: 200克 (200 颗粒丸)  
 价钱: **RM93.80** 每罐                      数量: 30克 (30 颗粒丸)  
 价钱: **RM62.50** 每罐                      数量: 15克 (15 颗粒丸)

是否有手足口症、沙门氏菌，伤寒，流感病毒等问题？成为生殖器？害怕被各种细菌和病毒感染吗？

CLO2 DUTRION TABLET SPRAY让您开始受到保护！CLO2 DUTRION TABLET仅用一种产品即可帮助您实现无细菌的环境！

**荷兰产品****CLO2 DUTRION安全消毒颗粒丸**

- \* 用于保护您和您的爱人免受交叉污染的细菌和病毒的伤害。
- \* 有效立即消灭各种病毒，细菌和真菌。
- \* 不形成副产物（无副作用）。
- \* 无酒精，无毒且无腐蚀性的。
- \* 简单易用和应用。
- \* 安全概念与其他消毒产品相比。
- \* 为您的日常清洁需求引入安全，简单，有效的消毒剂。
- \* 可用作洗手液（无需冲洗）。
- \* 可以用作普通的家用消毒剂，例如硬表面消毒剂（拖把地板，擦桌子和椅子，衣服，厕所）。
- \* 适合用于学校，办公室，公共区域（大型购物中心，运动场，健身房和游泳池）等所有地方。
- \* 适合用于任何健康环境并且想要在无病毒和细菌的环境中生活的人。  
 适合婴儿，学步车，孕妇妈妈，成年人，您的妻子，丈夫，朋友，同事，女友，男朋友，甚至老板。
- \* 杀菌消毒溶液存放在不透明的瓶罐里可保质期为30天。

**如何使用？**

- 1.只需打开盖子
- 2.将1片消毒药丸加到1升水中
- 3.等待5分钟，使药丸溶解。
- 4.到入喷雾瓶里就可以使用
- 5.无需冲洗

**TOGETHER  
 STAY STRONG  
 FIGHT COVID-19  
 GET WELL SOON  
 WORLDWIDE**

**Stop Bring  
 The Virus  
 Go Home**

**如何储存？**

- \*CLO2杀菌消毒丸需远离紫外线。
- \*存放于室温阴凉干燥处。
- \*杀菌消毒溶液存储在不透明的容器里或不透明的喷雾瓶里。

**应用和稀释表**

## Formulation – Application

### Formula & Benefit

Our Chlorine Dioxide (ClO<sub>2</sub>) active concentration and tablet is a powerful & Safest Microbial Solutions and transportable, non-explosive, once added to a specific volume of water, reacts quickly and safe into a long lasting chlorine dioxide solution with precise concoctions. Safe concept, simple handling and very cost effective,

- Our Dutrion® and Batrion™ active solution and tablet is worldwide licence holder and provider of economical and safe chlorine dioxide solutions.
- ClO<sub>2</sub> is now recognized as one of the safest, most effective biocides and sanitizing agents available today. As a result it is widely used in both large and small-scale industrial and commercial applications where a potent but environmentally friendly biocide is required.
- ClO<sub>2</sub> is effective over a wide pH range in both hard and soft water and does not react with most other water treatment chemicals or hazardous disinfectant. Many of its uses and applications are international approved. » ClO<sub>2</sub> is now recognized as one of the safest, most effective biocides and sanitizing agents available today. As a result it is widely used in both large and small-scale industrial and commercial applications where a potent but environmentally friendly biocide is required.
- ClO<sub>2</sub> is effective over a wide pH range in both hard and soft water and does not react with most other water treatment chemicals or hazardous disinfectant. Many of its uses and applications are international approved.
- Our Bactore solutions create the right environment for the ClO<sub>2</sub> molecules with a long biocidal effect and long lasting residual, for the right price and in the right packaging. The potential for our technology is far reaching; applications range from drinking water, animal health, food industry, bio security, etc.

### Chlorine dioxide (ClO<sub>2</sub>) is not same as chlorine (Cl) :

Although chlorine dioxide (ClO<sub>2</sub>) has chlorine as part of the name is chlorine dioxide chemistry quite different from the chemistry of chlorine. A single atom can mean all the world difference.

The difference between chlorine(Cl), and chlorine dioxide(ClO<sub>2</sub>), resulting from their different chemical structure – and this is what determines their significantly different chemical reactions.

Chlorine dioxide does not form chlorinated disinfection byproducts. The use of chlorine dioxide instead of chlorine prevents the formation of harmful halogenated disinfection by-products, for example trihalomethanes (THM) and halogenated acidic acids.

Chlorine dioxide does not react with ammonia nitrogen, amines or other oxidizable organic matter. Chlorine dioxide removes substances that can form trihalomethanes (THM) and improves coagulation. It does not oxidize bromide into bromine.

|   | 100% Utilisation for bacteria kill | General Oxidant | Corrosive | Hazardous in use | After pH? | Produce harmful by products | Will produce chlorine | Specific to targeting bacteria | Leaves Residues on product | Tainting Issues | Reacts with hydrocarbons | Operate in turbid water | ClO <sub>2</sub> advantages Comparison chart |

### Understanding Chlorine Dioxide [ClO<sub>2</sub>]

#### Chlorine dioxide (ClO<sub>2</sub>) is not the same as chlorine (Cl):

- Although ClO<sub>2</sub> has chlorine as part of the name is chlorine dioxide chemistry quite different from the chemistry of chlorine.
- A single atom can mean all the world difference.
- The difference between chlorine (Cl) and chlorine dioxide (ClO<sub>2</sub>), resulting from their different chemical structure – and this is what determines their significantly different chemical reactions.

#### Chlorine dioxide's advantages over chlorine:

- Among the advantages of ClO<sub>2</sub> can also be mentioned that, there will be no chlorinated by-products, there is a positive effect associated with flocculation of water, or other water chemical additives.
- Another advantage of ClO<sub>2</sub>, more adjacent to the disinfection, the ClO<sub>2</sub> does not react with ammonium. This may therefore be advantageous when ammonium content in the water is high.
- Superior disinfection capability was recorded with chlorine dioxide in the presence of enteric bacteria, Legionella, Pseudomonas aeruginosa, and others. In bathing water, drinking water, cooling water, process water, food and many more.

**+** About Our Chlorine Dioxide

Chlorine dioxide (Clo2) exists as a gas at normal temperatures and pressures and has the chemical formula ClO2. It is a highly effective, eco-friendly microbicide that carries a number of important regulatory approvals from several international organisations including the US EPA, FDA and UK Government for many of its uses.

Chlorine dioxide is a strong bactericide and virucide at concentrations as low as 0.1 ppm. It will eliminate both planktonic and sessile bacteria; disinfect surfaces; and rapidly destroy problematic biofilm. With minimal contact time, it is highly effective against many pathogenic organisms including bacterial spores, Legionella, Tuberculosis, MRSA, VRE, Listeria, Salmonella, amoebal cysts, Giardia cysts, E. coli, and Cryptosporidium. Importantly, chlorine dioxide also destroys biofilm so bacterial re-growth is significantly impeded.

**Broad spectrum biocide**

Chlorine dioxide is highly effective when used to control:

- Bacterial spores
- Legionella (Legionnaires' disease)
- Biofilm
- Tuberculosis
- Salmonella
- Cryptosporidium
- Giardia cysts
- Coliforms
- MRSA
- Listeria
- Shigella
- Algae
- Amoebae
- Taste and odour
- THM/HMM formation
- Planktonic and sessile organisms
- VRE

Chlorine dioxide has long been recognised as a very effective biocide and sterilising agent for both large and small scale industrial and commercial applications. It is approved and recommended by the United States Environmental Protection Agency (US EPA) as an environmentally friendly drinking water additive to replace chlorine (which is known to form carcinogenic by-products).

The criteria for disinfection, as defined by the US EPA, are as follows:

- a 99.9% reduction in giardia lamblia (3 log reduction).
- zero lactose fermenting coliform.
- less than 10 cfu/ml non-lactose fermenting coliforms.
- 99.99% reduction in enteric virus (4 log) concentrations.

Chlorine dioxide meets these criteria and is now used extensively across the US, UK and Europe. In the UK, the Building Services Research and Information Association (BSRIA) has recommended chlorine dioxide as the best available technology for the control of Legionella bacteria in hot and cold water systems.

**+** Applications & Protection

Bactore product actives has abilities to provide ultimate bacteria solution to ensure safe & effective disinfection, sanitization, and sterilization against pathogens. This is to prevent the RISK of spreading harmful microorganisms and cross-contamination of bacteria.

- ✓ **Sanitize & Kills Bacteria**
- ✓ **Disinfect & Eliminate Viruses**
- ✓ **Sterilize & Prevent Fungicide, Algae-Cyanobacteria, Microbial Corrosion**

**Environmental Friendly: Treating and Sterilizing Water**

Since the beginning of the twentieth century, when it was first used at a spa in Ostend, Belgium, chlorine dioxide has been known as a powerful disinfectant of water. During the 1950s, it was introduced more generally as a drinking water disinfectant since it provided less organoleptic hindering than chlorine. Approximately 700 to 900 public water systems use chlorine dioxide to treat potable water (Hoehn, 1992).

Today, the major uses of chlorine dioxide are:

- CT disinfection credit;
- Pre-oxidant to control tastes and odour;
- Control of iron and manganese; and
- Control of hydrogen sulfide and phenolic compounds. For water treatment, chlorine dioxide has several advantages over Chlorine: Report by the US EPA (US Environmental Protecting Agency)

**Chlorine Dioxide (Clo2) Applications**

Chlorine dioxide is now recognised as one of the safest, most effective biocides and sterilising agents available today. As a result it is widely used in both large and small-scale industrial and commercial applications where a potent but environmentally friendly biocide is required.

Chlorine dioxide is effective over a wide pH range in both hard and soft water and does not react with most other water treatment chemicals. Many of its uses and applications are US EPA, FDA, UK Government approved and highly recommended by many researchers and research establishments throughout the world.

CLO2 Disinfectant

**What are chlorine dioxide tablets**

Chlorine Dioxide (CLO2) tablets are a blend of precursor chemicals which when added to the pool water then forms Chlorine Dioxide. Ideal for elimination of Cryptosporidium and Chloramines. Little 'down time' of swimming pool as there is no need for Chlorine reduction after use.

**What are the advantages to use Chlorine Dioxide for Kitchen Disinfection**

Chlorine Dioxide is the fourth generation disinfectant for sterilization. It has been recognized as level A1 disinfectant with its broad spectrum, high efficiency and non toxicity by WHO. USEPA, FDA, Sanitary Regulation of Japanese and EU declare that it is a green and environmental protect substitute for chlorine disinfectant. This product is highly refined preparations containing chlorine dioxide and its derivatives, safe, non-toxic and convenient.

This disinfectant is specially developed for tableware sterilization. It can quickly kill pathogenic bacteria and viruses on tableware, drink utensil, and kitchenware without any side effect on human body.

**How To Use**

Wash all table wares clean, and Soak them in chlorine dioxide solution of appropriate concentration. This will save a lot cost which is spent on steaming and human source. All table wares could be directly used without swilling.

**Application Range**

1. Tableware, drink utensil and kitchenware sterilization
2. Tea and milk stains removal

**Safety Performance**

Chlorine dioxide has been proved non-toxic thorough many experiments in home and abroad. It won't produce three-pathogenic substances and other poisonous substance. It is a broad spectrum disinfectant without any stimulation to human body. And there is no residue for the decomposition product are water, sodium chloride and carbon dioxide.

**Approving Time by Different Countries**

| Time | Country   | Approval Authority | Range of Application  |
|------|-----------|--------------------|---|
| 1992 |           | WHO                | Drinking Water Disinfection   |
| 1987 | Germany   |                    | Drinking Water Disinfection   |
| 1985 | America   | FDA                | Food Processing Equipment Disinfection  |
| 1987 | America   | EPA                | Disinfection for Food Processing Factory & Beer Brewery & Restaurant & Hospital, etc                    |
| 1989 | America   | EPA                | Disinfection for Store Water & Animal Shelters  |
| 1988 | Japan     | Ministry of Health | Drinking Water Disinfection   |
| 1987 | Australia | Ministry of Health | Food Additives #926, Food Bleaching Agents  |
| 1987 | China     | Ministry of Health | Disinfection for Food Industry & Medical & Pharmacy & Livestock & Aquaculture & Public Environment, etc |
| 1996 | China     | Ministry of Health | Food Additives for Aquatic and Fresh Products   |
| 2002 | America   | FDA                | Disinfection for Food Processing Equipment & Pipes & Milk Processing Plants                             |
| 2005 | China     | Ministry of Health | Drinking Water Disinfection   |

Its safety is regarded as AI level by the world health organization (WHO).

**Efficacy of alcohols and alcohol-based hand disinfectants against human enterovirus 71.**

Chang SG<sup>1</sup>, LiWC, Huang KY, Huang YG, Chiu CH, Chen CJ, Hsieh YC, Kuo CY, Shih SR, Lin TY.

Author information

**Abstract**  
**BACKGROUND:** Human enterovirus 71 (HEV71) infections are a significant public health threat in the Asia-Pacific region and occasionally cause severe neurological complications and even death in children. Although good hand hygiene is important for controlling infection, relevant data regarding the efficacy of widely used hand disinfectants against HEV71 are still lacking.  
**AIM:** To investigate the virucidal activity of alcohols and alcohol-based hand disinfectants against HEV71.  
**METHODS:** A common alcohol-based hand disinfectant (0.5% chlorhexidine gluconate + 70% isopropanol) as well as different concentrations of isopropanol and ethanol were tested for virucidal activity against HEV71 using the suspension and the fingerpad tests.  
**FINDINGS:** In suspension tests, 85% and 95% ethanol achieved a mean log<sub>10</sub> reduction factor in HEV71 titre of >3 and nearly 6, respectively, within 10 min. By contrast, 70% and 75% ethanol and any concentration of isopropanol (70-95%) produced a factor of <1 in this test after the same exposure time. In fingerpad tests, only 95% ethanol showed a mean log<sub>10</sub> reduction factor of >4, while both 75% ethanol and a chlorhexidine gluconate-containing formula were ineffective against HEV71 with a mean log<sub>10</sub> reduction factor of <1 after a 30 s exposure time.  
**CONCLUSIONS:** Widely used alcohol-based hand disinfectants based on 70% ethanol or isopropanol have poor effectiveness against HEV71. Ninety-five percent ethanol is the most effective concentration, but still cannot fully inactivate HEV71 and may be impractical for use in many instances. Hand hygiene with alcohol-based hand disinfectants alone is not recommended for preventing HEV71 transmission.

**PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS.**  
**DANGER: CORROSIVE.** Causes irreversible eye damage and skin burns. Harmful if swallowed. Do not get in eye, on skin or on clothing. Wear goggles and gloves when handling this product. When thoroughly with soap and water after handling and do not drink, eat, drink, chewing gum, using tobacco or using the restroom. Avoid breathing vapors and use only in a well-ventilated area. **FIRST AID: IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Flush skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF SWALLOWED:** How person ate a quantity of water if able to swallow. Do not induce vomiting; areas should be so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **NOTE TO PHYSICIAN:** Possible mucous membrane damage may contraindicate the use of gastric lavage. Call a poison control center or doctor immediately for further treatment advice. Place the product container or label with you when calling a poison control center or doctor, or going for treatment. Chemical Name: 1,3,5,7,8-TETRACHLORO-4-HYDROXYISOPHTHALENE. **PHYSICAL OR CHEMICAL HAZARDS:** Product contains strong oxidizer. Always flush down before and after use. Do not use or mix with other household chemicals, such as toilet bowl cleaners, rust removers, acids or products containing ammonia. To do so will release hazardous, irritating gases. Prolonged contact with metal may cause pitting or discoloration. **ENVIRONMENTAL HAZARDS:** This product is toxic to fish, aquatic invertebrates, oysters and shrimp.

**STORAGE AND DISPOSAL:** Store away from children. Rubize use tightly after each use. Store this product upright in a cool, dry area, away from direct sunlight and heat to avoid deterioration. Do not store in a closed or sealed container. Dispose of or clean of equipment. **PRODUCT DISPOSAL:** Product or residues that cannot be used or diluted with water before disposal in a sanitary sewer. **CONTAINER HANDLING:** Never fill the container. Do not reuse or refill this container. RECYCLE: Empty container or discard in trash. CONTAINER NO. P-252-00000

**CADANGAN PEMBEKALAN PRODUK ASYLEA SEBAGAI BAHAN PEMBASMIAN KUMAN UNTUK PENCEGAHAN COVID-19**

Dengan segala hormatnya saya merujuk kepada perkara tersebut di atas dan surat daripada pihak tuan yang telah diterima oleh pihak kami pada 1 April 2020.

2. Terlebih dahulu Kementerian ini mengucapkan terima kasih di atas cadangan pihak Tuan untuk membekalkan bahan pembasmi kuman untuk pencegahan COVID-19. Kementerian Kesihatan Malaysia (KKM) mengambil maklum berhubung permohonan pihak Tuan untuk membekalkan produk Asylea sebagai bahan pembasmi kuman untuk pencegahan COVID-19.

3. Sehubungan itu, sekiranya terdapat keperluan, pihak KKM akan menghubungi pihak Tuan untuk tindakan selanjutnya.

Sekian, terima kasih.

 SIRIM Berhad

SIRIM BERHAD, Malaysia:  
 Efficacy Challenge E. Coli (ATCC 8739)  
 Kills > 99.999%

Final Report: VIRUCIDAL HARD-SURFACE EFFICACY TEST - MERS-Coronavirus (MERS-CoV)

**RESULTS (continued)**

**Table 5**  
**Viability Control Results**

|                                      |
|--------------------------------------|
| Cell Viability Control               |
| 0/4                                  |
| Cells were viable; media was sterile |

**Table 6**  
**Viral Reduction**

| Contact Time | Viral Load  |  | Log <sub>10</sub> Reduction* | Percent Reduction |
|--------------|---|--|------------------------------|-------------------|
|              | Input Load* (Log <sub>10</sub> TCID <sub>50</sub> ) | Output Load* (Log <sub>10</sub> TCID <sub>50</sub> ) |                              |                   |
| 20 minutes   | 6.85  | ≤ 3.10   | ≥3.75                        | ≥99.9%            |

**CONCLUSIONS**

According to the regulatory agency, the test substance passes the Virucidal Hard-Surface Efficacy Test if there is complete inactivation of the challenge virus at all dilutions. When cytotoxicity is evident, at least a three-log<sub>10</sub> reduction in titer must be demonstrated beyond the cytotoxic level.

When tested as described, airGUARD passed the Virucidal Hard-Surface Efficacy Test when MERS-Coronavirus (MERS-CoV), containing 5% organic load, was exposed to the test substance for 20 minutes at 20°C. All of the controls met the criteria for a valid test. These conclusions are based on observed data.

United States ( EPA )  
 Corona virus (MERS-coV)  
 Virucidal Efficacy Challenge Kills>99.9%

**TEST REPORT** Page 1 of 1  
 (This Report is issued subject to the terms & conditions set out below)

**Subject** : Residual efficacy test on one sample of 'AIR GUARD 365' submitted by Mimizu (Singapore) Pte Ltd on 28/04/2015 and test commenced on 29/04/2015.

**Tested For** : Mimizu (Singapore) Pte Ltd  
 26 Sin Ming Lane #07-122  
 Midview City  
 Singapore 573971  
 Attn : Mr K W Chia

**Test Method** : Client's Method

**Test Condition** : Floor tile surface were contaminated with  $10^8$  cfu/ml *E coli* bacteria inoculum and air dried in a biohazard hood for 60 minutes then swab test were conducted. 'AIR GUARD 365' were sprayed on the *E coli* bacteria contaminated floor tile surface and allow for 10 minutes, following swab sample being collected on the floor surface.

**Sample Description** : One sample received in sealed plastic bottle with the following marking: 'AIR GUARD 365'.

**Results** :

| Before cfu/swab   | After cfu/swab | Reduction Rate % |
|-------------------|----------------|------------------|
| $8.1 \times 10^5$ | 80             | 99.99            |

**Conclusion** : Based on the above observation, the sample as received exhibited 99.99% bacteria reduction of the above testing strains.

**ACTION MEMORANDUM**

**SUBJECT:** Inert Ingredient Tolerance Reassessment – Titanium Dioxide

**FROM:** Dan Ross, Chief, Inert Ingredients, and Inert Ingredients Response Branch

**TO:** Lois A. Rossi, Director, Registration Division

**I. FQPA REASSESSMENT ACTION**

**Action:** Reassessment of two (2) inert ingredient exemptions from the requirement of a tolerance.

**Chemical and Use Summary:** See table below.

| Tolerance Exemption Expression             | 40 CFR §             | Use Pattern (Pesticidal)   | CAS Reg No. | List Classification |
|--|----------------------|--|-------------|---------------------|
| Titanium dioxide (CAS Reg. No. 13463-67-7) | 180.920 <sup>2</sup> | Pigment/coloring agent in plastic bags used to wrap growing bananas (preharvest), colorant on seeds for planting | 13463-67-7  | 4B                  |
| Titanium dioxide (CAS Reg. No. 13463-67-7) | 180.930 <sup>2</sup> | Pigment/colorant in pesticide formulations for animal tag  |             |                     |

1. Residues listed in 40 CFR §180.920 [formerly 40 CFR§ 180.1001(d)] are exempted from the requirement of a tolerance when used as inert ingredients in pesticide formulations when applied to growing crops only.

2. Residues listed in 40 CFR §180.930 [formerly 40 CFR§ 180.1001(e)] are exempted from the requirement of a tolerance when used as inert ingredients in pesticide formulations when applied to animals.

# Airborne Sanitizing Solution

CLEANER AND SAFER FOR YOUR AUTOMOTIVE

## AirbornePRO

### What Are VOCs?

Understanding the environmental effects of these harmful chemicals

Volatile organic compounds (VOC) are substances that evaporate at room temperature and are commonly found in household products and building materials.

#### BENEFITS :

- ✓ Germicide 99.99% ( Kills germs)
- ✓ Decompose TVOC (Carcinogen Chemical)
- ✓ Not Masking
- ✓ Negative Ion

#### Service

Surface Pro90 Coating :

Per Square Feet Rm 1.00  
Minimum Per Order Rm 1000.00

#### Cover Area

Indoor / Outdoor

## THE NEXT GENERATION OF PROTECTION

Asylea™ alcohol-free hand sanitizer is an advanced nano mineral-based hand sanitizer formulated in Australia that provides longer protection for up to 12 hours in one single application.

Asylea™ alcohol-free hand sanitizer eliminates 99.99% germs with germicidal and germistatic properties. This means that on top of effectively killing germs, it inhibits the growth of germs on your hands, unlike typical hand sanitizers where germs can still grow and proliferate in the moisturizing agents used.

Asylea™ alcohol-free hand sanitizer is gentle on the hands, does not irritate or cause dryness to the skin, making it suitable to be used for mothers and children.

**“DON'T WAIT FOR THE NEXT OUTBREAK , KEEP PROTECTED AT ALL TIMES!”**
